Roofingreen®  
NATURE SIDE

patented  
product

made  
in Italy

**Outdoor module for coating  
and insulation of vertical  
ventilated walls**

**R**oofingreen Nature Side is a patented modular system ideal for covering and insulating vertical ventilated surfaces. The Roofingreen Nature Side modules insulate vertical walls by covering them with a nice layer of synthetic grass, that improves the aesthetic impact and the thermal and acoustic performance of the building, thus being suitable for energy saving as well as for restructuring, redevelopment and new construction. By not requiring any maintenance and irrigation, Roofingreen Nature Side is a very competitive and sustainable solution, both from the economic and environmental point of view.
